Sambikerep Indah D1/32, Surabaya

Highly motivated Computer Science graduate combining a strong foundation in IT infrastructure with expertise in full-stack and mobile application development. Proven track record in optimizing system operations and translating analytical problem-solving skills into robust, data-driven software, including comprehensive asset management systems. Proficient in architecting secure backend environments and designing intuitive, High-Fidelity (Hi-Fi) UI/UX prototypes. Eager to leverage this dual technical expertise to deliver scalable and user-centric digital solutions.

Education Level

Universitas Kristen Petra  - surabaya	Jun 2020 - Jan 2026
Bachelor Computer Science, 2.91/4.00	

Work Experiences

Royal Regantris Hospitality - Surabaya	Mar 2025 - Mar 2026
IT Support	
- Maintained 99% system uptime for hotel IT infrastructure, troubleshooting networks, VHP systems, and 50+ employee workstations. - Delivered responsive technical support across 10+ departments, resolving an average of 15-20 IT helpdesk tickets weekly. - Executed daily data backups and weekly system updates, achieving 0 data loss and ensuring 100% compliance with internal cybersecurity protocols. - Configured and deployed 20+ hardware devices (routers, switches, printers), improving network stability and coverage by 30%. - Authored 5+ comprehensive SOPs and user guides for non-technical staff, reducing basic IT inquiries by 40%. - Negotiated with 3+ vendors for IT asset procurement, successfully optimizing acquisition costs by 15% while upgrading legacy systems.
